# Garment Quality Control Checklist

A structured QC checklist for final inspection. Match the standard to your product positioning and brief your inspector against the approved sample.

## Inspect against the approved standard

- Measurements within agreed tolerances
- Colour matches approved standard / shade band
- Construction matches the tech pack
- No critical defects (zero tolerance)
- Major and minor defects within AQL limits
- Trims and labels correct and secure
- Branding accurate (labels, tags, packaging)
- Care and country-of-origin labels correct
- Packing and carton marking correct
- Metal detection / needle policy confirmed
