# Tech Pack Requirement Checklist

---

A complete tech pack is the single biggest driver of fast, accurate sampling. Use this to make sure nothing is missing before development begins.

## Your tech pack should include

- Technical flat sketches (front and back)
- Full points-of-measure with a clear diagram
- Measurement tolerances per point
- Fabric specification (fibre, GSM, construction)
- Colour standard (Pantone or sealed reference)
- Trim and component schedule with placement
- Construction and stitching notes
- Branding: labels, tags, packaging detail
- Artwork files for print or embroidery
- Size range and grade rule
- Fit intent described in words
- Any safety or compliance requirements

---

*Educational buyer tool. A complete tech pack shortens the sampling loop and reduces rounds.*
